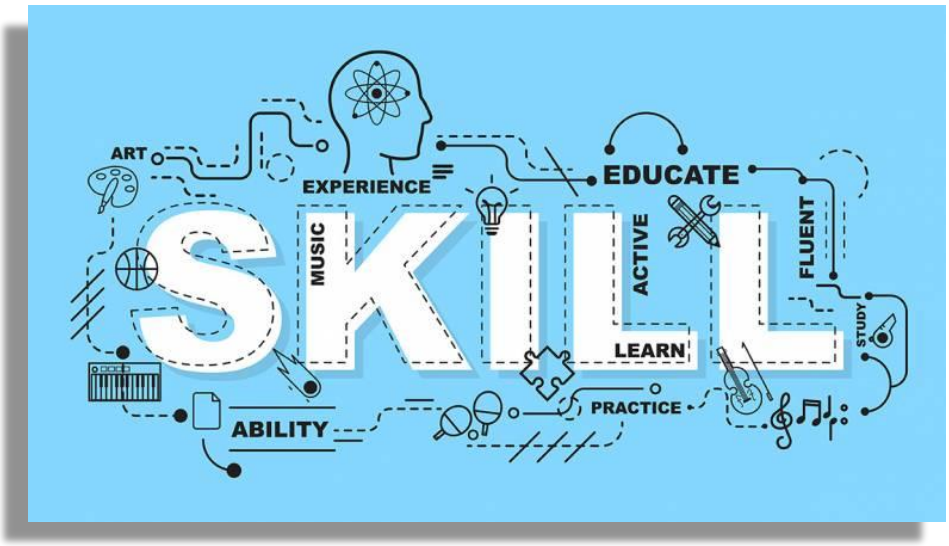
LorraineLee Training

A Workshop For Parents

Key Skills Secondary School Children Need

While adolescent children are not in the school environment, there are some essential skills they must continue to develop. Without usual access to teachers, peers, external motivation or extra curricular activities parents and caregivers have to gently assist growth in areas such as planning, time management, independent thinking, problem solving, following instructions and looking after their mental health.



Thursday 11th June 7:30-9:00pm
ZOOM WORKSHOP
