

# SETTING UP PARENTAL CONTROL OF **PHONES**

The majority of phones that students use today have smart capability. Along with the fantastic opportunities this brings them comes potential for children to compromise their cyber safety or run up expensive bills. However, parental controls can help reduce the risk of your child encountering inappropriate content when they are online. When enabling parental controls, use age-appropriate settings to filter, monitor and block your child's activities. Controls can also be imposed on purchases and download content ensuring better control of children's activity using these devices.
