# RAISING ACHIEVEMENT EVENING

**THE HAMBLE SCHOOL**  
ACHIEVING EXCELLENCE TOGETHER

**Ofsted**  
Good  
Provider

**WELCOME** to The Hamble School's Raising Achievement Evening for 2021-2022. We are sure you will agree that Year 11 is a crucially important year for your child. With this in mind, we want to empower you with the knowledge of what to expect this year with the intention of raising your child's attainment at the end of Year 11.

Within this booklet you will find a detailed overview for each subject. In particular you will see the topics studied at each stage throughout the year, support available to your child and guidance towards resources for how you can support your child with their learning. This is provided to enable you to have learning conversations with your child.

Should you have further questions, or require further detail on each course, please contact your child's tutor or class teacher in the first instance. Alternatively, contact the Director of Learning for the subject who can re-direct your queries on to the relevant teacher. Please visit the following website for our Staff Contact Directory, or to submit a query using Class Charts: <http://www.thehambleschool.co.uk/contact-us/>

## **A GUIDE ON HOW TO USE THE PIXL RESOURCES - SCIENCE**

We are a member of the PiXL group of schools. This enables us to make exclusive use of PiXL resources. A series of resources have been created to support students in independently learning the science content. These are exam board specific. Our exam board is AQA Trilogy Combined Science or AQA Trilogy Biology, Chemistry and Physics for Separate Sciences.

These resources are available to students via the Student drive here:

O:\Science\PixelResources or by the drop box link here:

[https://www.dropbox.com/sh/n4ifnwrz92u9bef/AAD11D8Q\\_ClwGhz5bBchfylea?dl=0](https://www.dropbox.com/sh/n4ifnwrz92u9bef/AAD11D8Q_ClwGhz5bBchfylea?dl=0)

### **KS4 Students**

The resources listed below can be used for first learning or for revision following an assessment – where there are gaps in knowledge.

#### **1. Get ITs - Cross Board resources to cover content in the Science GCSE at grades 1-2.**

The first member of the family are the Get Its, these are key word definitions and diagrams to label. These focus on the language needed to access the future resources.

#### **2. Know ITs - Knowledge PowerPoint and recall questions (exam board specific).**

The second stage of the IT Family are the Know Its, once you have completed the relevant Get Its, you can then use the knowledge PowerPoint to either learn or fill gaps in your knowledge. Along the way there are key recall questions to answer to check your understanding. The questions in the PowerPoint are the same as on the separate documents. If you are revising the question document would be best for challenging your recall, whereas if it is the first time learning, the PowerPoint is recommended. The answers can be found in the PowerPoint and the separate documents for checking of your learning through self marking.

#### **3. Grasp ITs - Application style questions (exam board specific).**

Once you have completed the topics Know Its and have self-marked and corrected your answers, you should challenge your understanding by attempting to apply it to new situations and different context. These are challenging questions and are found on both the foundation and higher tier papers, therefore should be attempted by all students. It is recommended that the Know It PowerPoint be readily accessible during this phase to refer back to at any point. This PowerPoint will provide you with the rules and reasoning to be applied to the Grasp It questions. The Grasp Its also have answers for self-marking and feedback.

#### **4. Think ITs - Challenge questions to support high attainers (exam board specific).**

The Think Its are designed for higher tier students, although foundation tier students would also benefit from accessing these resources. These are designed to stretch students' thinking and application of knowledge therefore have no answers.

## **Year 11 ONLY - 2019 Summer GCSE ReTeach and Extend Resources.**

These resources should be used following your completion of the GCSE exam papers used for Landmark 1 (paper 1's) and Landmark 3 (paper 2's) in year 11.

In this folder you will find a board specific summary of the key command terms (AQA). These can be read to understand fully the errors that students made in the 2019 examination series. The PowerPoint contains key mistakes and misconceptions that students made, to support you in not making the same mistakes. Examiners tend to repeat question styles or content that were poorly answered the previous year!

Using the PowerPoints that are highlighted as your learning priorities (on your Landmark Sticker), you should:

1. Read the points on the PowerPoint slide and make notes on a Thinking Map.
2. Answer the Knowledge questions within the PowerPoint.
3. Self mark and improve your answers using a green pen.

## **KS3 and KS4 Maths in Science Resources**

Organised by maths skills, these resources have a range of individual activities designed to develop the application of math skills into a science context. These can be completed as standalone activities.

## **KS4 PiXL Independence**

This is an online resource that provides students with a variety of activities to review content and practice application to a new context. These resources can be accessed using the following log in details:

Link: <https://students.pixl.org.uk>

PiXL School Number: 303941

Password: Indep161

Here you will find the booklets that can be viewed on any device to complete a range of activities across all three disciplines of science: biology, chemistry and physics. There is also a student led Diagnose, Therapy, Testing document which can be used to support the organisation of independent revision.
