

# Hamble Community Sports College

## BEST VALUE STATEMENT 2016-17

Hamble Community Sports College intends that the 'Best Value' principles should be applied to all matters within college where resources management and allocation are considered. These principles are:

- Compare
- Challenge
- Compete
- Consult

### Compare

The use of target setting, performance management and benchmarking is informed by the use of data available to the college and to individual staff. The use of published data, both academic and financial, is reported by the College to governors through committee meetings and Headteacher's reports. The use of soft data and the results of questionnaires inform judgements concerning the college's performance in relation to other schools locally and nationally.

### Challenge

Information gained is used to set targets and to inform Improvement Planning. Targets are set giving a realistic but challenging set of goals for students and staff.

### Compete

The LA maintains a list of suppliers of goods and services, setting out specifications for minimum standards and health and safety issues. The college seeks to build on this with clear specifications for development and purchases. Power is delegated to the Headteacher with regard to day to day management to implement expenditure related to the College Development Plan.

For major building works Hampshire County Council oversees any projects. Catering and cleaning contracts are tendered through Hampshire County Council.

### Consult

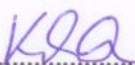

In developing policies, the Governing Body consults parents directly where relevant. Parents' views are sought through parent governors and through the Friends of Hamble Community Sports College as well.
