

University of
Southampton

DISCOVER YOUR FUTURE

**Learn with US
Year 10 Residential**

“

There is more
to uni than
just ‘study
study study!’”

The Learn with US Residential is a three-day, two-night residential where you will immerse yourself in university life and experience what it's like to study at university.

You'll experience our world class facilities, stay in our halls of residence, get involved with taster sessions, and find out what student life is really like.

Aims of the Residential:

- Enjoy an authentic experience of university life with like-minded students – both academic and social
- Connect with current university students who will share their own journey to higher education and ask important questions
- Gain an insight into the wide range of study and research options available at university and gain advice on the pathways you can follow to access those opportunities
- Gain confidence working with new people in a new environment

What you will be doing:

- Experience your choice of subject taster seminars
- Explore our range of courses by talking to subject specialists
- Engage in activities designed to highlight the diverse nature of student life, both on and off campus, and begin to define your own unique experience
- Complete a group project based on your residential experience
- Live like a student in university accommodation (in your own ensuite room)
